

**WOW, I couldn't believe they were my own lashes. The effect is simply amazing, I love them and so does everyone else"**

#### **What are the benefits of LVL Lashes?**

- LVL is a treatment for your natural lash, no lash extensions needed
- The treatment takes just 45 minutes and is very comfortable.
- LVL lasts up to 6 weeks, the natural life cycle of an eyelash.
- LVL offers an anti-ageing effect, brightening & lifting the eye area.
- The treatment incorporates a colour boost giving an immediate, visible difference.

#### **What happens during the treatment?**

With your eyes closed throughout, the therapist will choose the appropriate sized foam roller and fix to your eyelids with water soluble glue. The lashes are then separated and rolled onto the roller where perming lotion is applied to the lash root and left for 15 minutes. This is followed by the application of a neutraliser. This is left for a further 15 minutes and then removed. Using damp cotton wool the roller is gently removed leaving you with beautifully lifted lashes. Finally, your lashes are tinted for maximum effect.

**Please note:** You will need to pop in for a patch test at least 48 hours prior to your treatment to ensure you are not allergic to the products used.
